**THE KREISER AWARD FOR ENVIRONMENTAL TAXATION**

The Kreiser Award for Environmental Taxation is an honour granted annually to a person who has made a significant contribution to the advancement of environmental taxation and other economic instruments in research or policy. The award is named after Professor Larry Kreiser, a pioneer researcher in the field of environmental taxation and the individual who had the inspiration and energy to begin gathering experts from key disciplines together to create a forum for exchanging the latest research and experience on the use of environmental taxes. This initial idea was the seed that led to this successful series of annual conferences on environmental taxation.

**2007 RECIPIENT – PROF. DR. ERNST-ULRICH VON WEIZSÄCKER**

Professor Dr. Ernst Ulrich von Weizsäcker has for many years been one of the driving forces behind environmental taxation in Germany and has produced many works on the subject, including *Earth Politics* and *Factor 4: Doubling Wealth, Halving Resource Use*.

Prior to joining the Bren School as Dean in January 2006, he served as the policy director at the United Nations Centre for Science and Technology for Development, director of the Institute for European Environmental Policy, and president of the Wuppertal Institute for Climate, Environment, and Energy. He is a member of the Club of Rome, a global think tank devoted to improving society, and he served on the World Commission on the Social Dimensions of Globalization. Later he became a member of the Bundestag, the federal parliament of Germany, where he was appointed Chairman of the Environmental Committee. He has also served as a professor of interdisciplinary biology and was the founding president of the University of Kassel in Germany. He is co-founder of Green Budget Germany.
